Data summary

Country	Use Real Coordinates?	Use Partitioning_plot?	Use Clusters?
Austria	No	Yes	Yes
Czech Republic	No	Yes	Yes
Denmark	Yes	Only partitioning plots	No
Finland	No	Yes	Yes
France	Yes	Yes	No
Great Britain	Yes	No	No
Norway	No	Yes	No
Romania	No	Yes	Yes
Spain	Yes	Only partitioning plots	No
Sweden	No	No	Yes
Switzerland	Yes	Yes	No

29/03/2010

Number of uploaded plots

29/03/2010

Feedback 1/2

- Differences compared with the 1st submission
- New tree species list (new list taken into account?)
- Domains (definition for each country)
 - ⇒ Clarifications needed
 - ⇒ Find a common agreement
- Partitioning plots
 - ⇒ Clarifications needed
 - ⇒ Find a common agreement

29/03/2010

Feedback 2/2

- All plots from the systematic sampling should be provided (even non-forest plots or plots without any information on tree species)
- Is statistical_weight variable clear?
- Not only one tree species per plot
- Query module
- Other difficulties / constraints

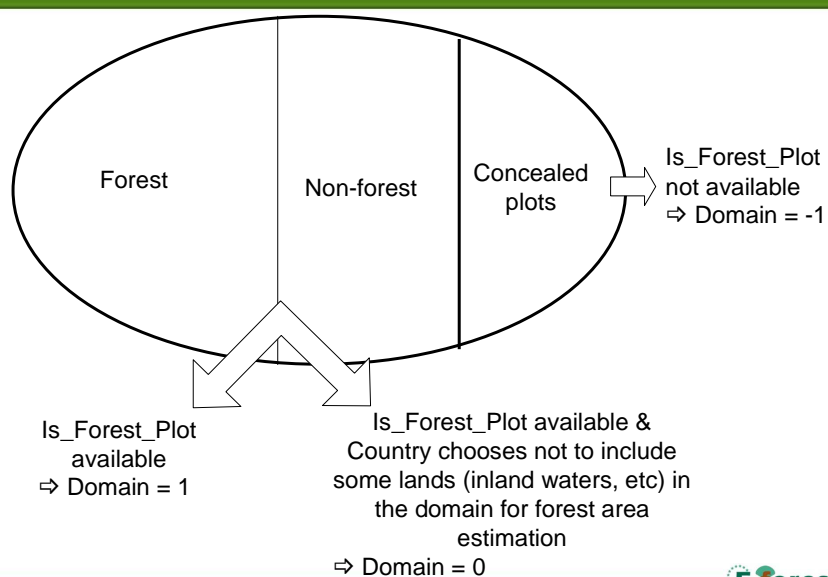

29/03/2010

French feedback

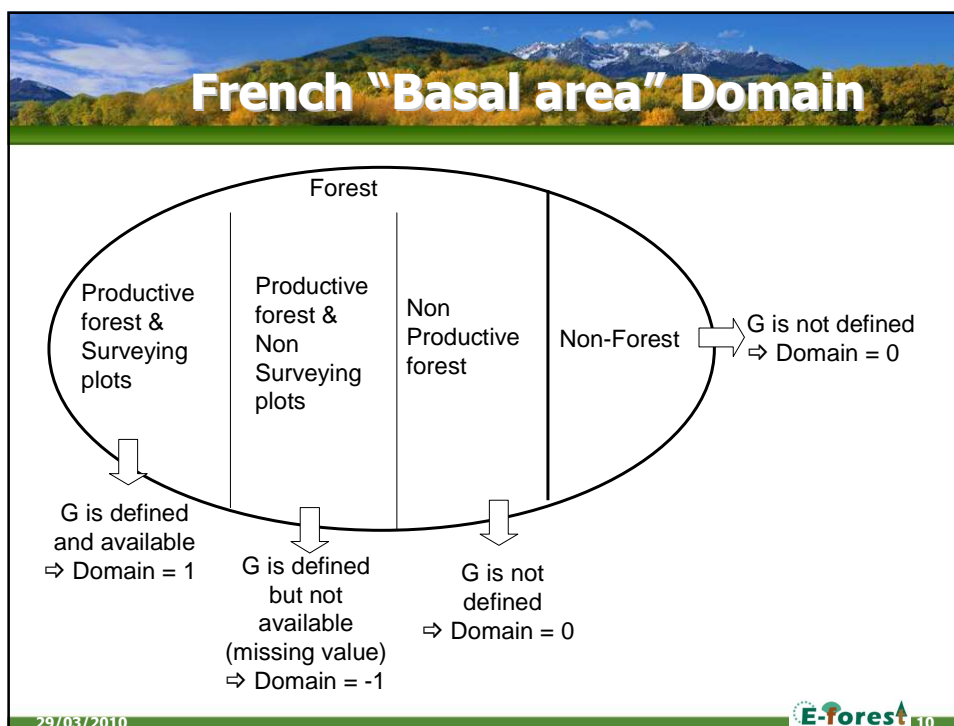

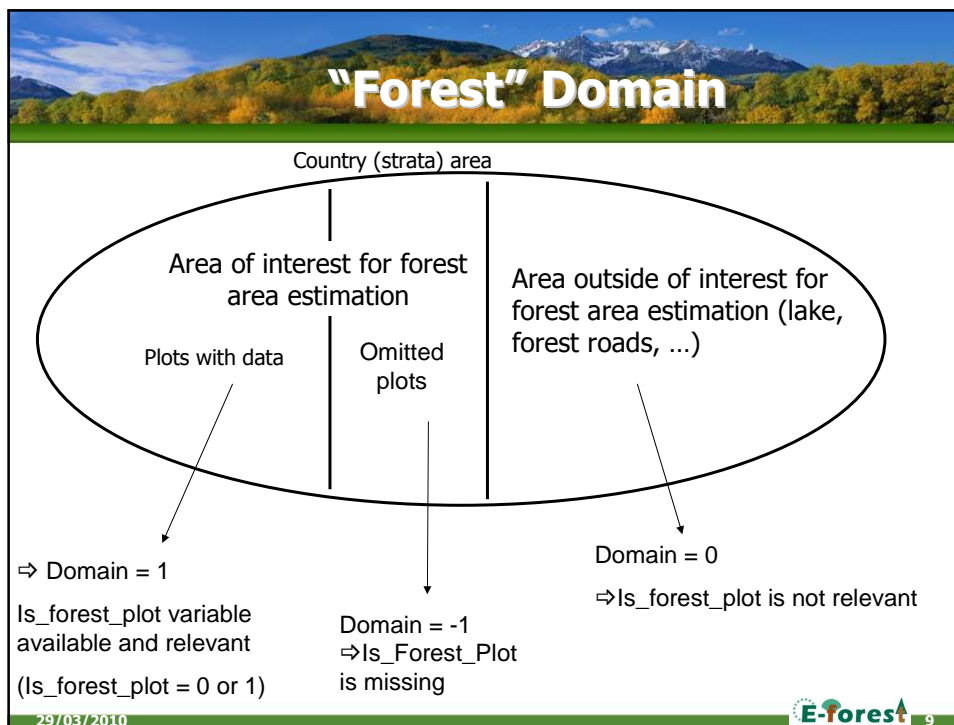

- Is_partitioning_plot:
 - Use of this variable
 - Differentiation between forest/non-forest boundary and forest/forest boundary (e.g. in case of different stand types)
- Only terrestrial grid provided
- Some species were merged (*Pinus nigra* subsp. *salzmannii* and *Pinus nigra* subsp. *laricio*)

29/03/2010

French "Forest" Domain

29/03/2010

New countries – Tour de table

- Non-forest plots available?
- Questions on strata
- Questions on domains
- Questions on plot partitioning
- Questions on plot coordinates (shifting, clusters)

29/03/2010

Reference period

Country	Cycle	Reference period	
		Beginning	End
Austria	6	2000	2002
Czech Republic	1	2001	2004
Denmark	1	2002	2006
	2	2007	2011
Finland	10	2003	2003
		2004	2008
France	5	2005	2009
Great Britain	1999	1995	2000
Norway	9	2004	2008
Romania	1	2008	2012
Spain	3	1997	2008
Sweden	2006	2004	2008
Switzerland	3	2004	2006

29/03/2010

Strata

Country	Cycle	Sum of strata area (km²)	Country area (km²)	Diff in %
Austria	6	83858	83870	0,01
Czech Republic	1	78869	78866	0,00
Denmark	1	4977	43094	88,45
	2	5126	43094	88,11
Finland	10	304147	338145	10,05
France	5	547435	547030	-0,07
Great Britain	1999	25565	229 850	88,88
Norway	9	276517	324220	14,71
Romania	1	238383	237500	-0,37
Spain	3	77977	505580	84,58
Sweden	2006	475636	449964	-5,71
Switzerland	3	41284	41285	0,00

29/03/2010

Domains

Domain	Query	Country	Plot Number	Domain value
Forest	Forest plot and domain forest = -1 (missing information)	Spain	1531	
	Forest plot and domain forest = 0 (variable not defined)	/	/	
Basal Area	Domain basal area \neq 1 (missing information or variable not defined)	Czech Republic	40	-1
		France	101740	0
		Finland	1	0
		Austria	110	0
			9	-1
		Romania	3353	0
Both	Domain basal area = 1 and domain forest \neq 1 (missing information or variable not defined)		3	-1
		Spain	1531	

Spain: Domain forest >10% crown cover (differs from the national definition)

29/03/2010

Dbh class effect

29/03/2010

Number of different tree species

29/03/2010

E-forest 17

Basal area results 1/2

29/03/2010

E-forest 18

Basal area results 2/2

Basal area for Denmark (Mean = 19.5 , Median = 19.2)

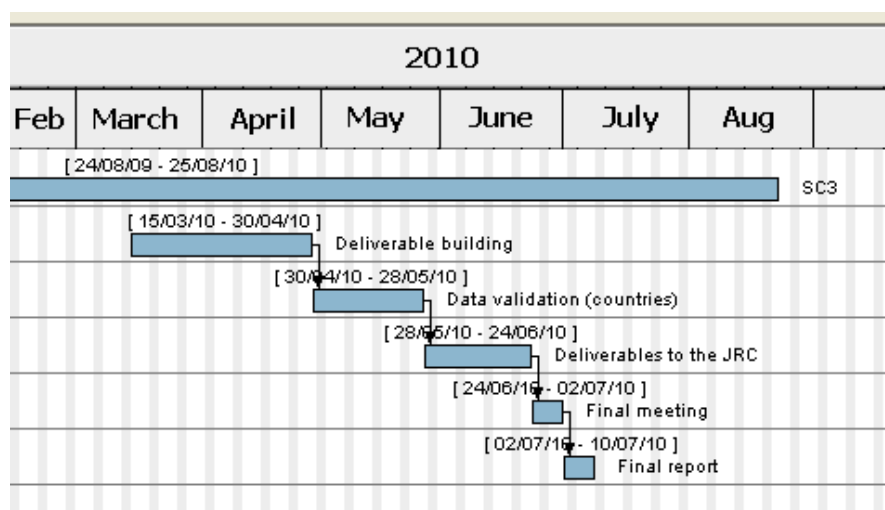

Basal area for Switzerland (Mean = 30.1 , Median = 28.5)

SC5 Timetable

29/03/2010

Validation of the deliverables

- 1) Methodology for producing the deliverable has to be defined in a transparent way by the permanent members of the consortium
- 2) Each country has to have access to the deliverable using the E-forest platform -> access to all the data for all the countries (to be validate)
- 3) Validation of the deliverables during a defined period by each country
- 4) Remarks sent to the generic E-forest email
- 5) Remarks has to be managed by the permanent members of the consortium

29/03/2010

Final report outline

29/03/2010

Thank you for your attention

© IFN 2009

SC3 Timetable

Description	Date
Deliverable building	Until April 30
Access of the country to the data for validation	Until May 31
Remarks on data check (to eforest@ifn.fr)	
Deliverables to the JRC	Until June 24

29/03/2010

SC5 Timetable

Description	Date
Opening of the platform	At contract notification = T_0 (expected date?)
Results of pre-study for qualifying JRC forest layers	1.5 month after T_0
First data upload for the new countries	Until 2 months after T_0
First data check	Until 3 months after T_0
Potential new submission	Until 4 months after T_0
New data check if necessary	Until 5 months after T_0

29/03/2010

SC5 Timetable

Description	Date
Deliverable building	Until 7 months after T_0
Access of the country to the data for validation	Until 9 months after T_0
Remarks on data check (to eforest@ifn.fr)	
Deliverables to the JRC	$T_0 + 10$
